

ABHISHEK SURATIYA

LEAD SOFTWARE DEVELOPER

a.k.suratiya@gmail.com | +91-8468893464 | [LinkedIn](#) | [Portfolio](#) | Delhi, India

PROFESSIONAL SUMMARY

Results-driven software engineer with over 5.5+ years of professional experience specializing in building high-performance, scalable web and mobile applications. Proficient in crafting robust architectures using React, React Native, and Next.js. Demonstrated ability to lead full-lifecycle development, optimize application bundle sizes, establish enterprise UI libraries, and implement complex architectural patterns like robust state management, real-time data sync, and dynamic fluid animations.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, GraphQL
- **Frontend & Web:** React.js, Next.js, Zustand, TailwindCSS, Material-UI, Radix UI, Styled Components, HTML5, CSS3, SCSS, WebSockets, SEO, Web App Profiling / Performance Optimization
- **Mobile Development:** React Native (0.85), EAS (Expo Application Services), Fastlane, CodePush OTA Updates, Reanimated, FlashList, MMKV, React Navigation, Branch.io, Firebase Analytics, Mixpanel, Microsoft Clarity, App Store & Play Store Deployment
- **Architecture & Libraries:** Tsup/Monorepo (UI Component Libraries), Tiptap, Firebase, AWS SDK, Sentry, CleverTap
- **Tools & Setup:** Git, Docker, Jest, ESLint, Prettier
- **AI & Dev Tools:** Vibe Coding, Antigravity, Cursor, GitHub Copilot
- **Core Concepts:** App Size Optimization, Performance Tuning, Mobile App Security Improvements, UI/UX Implementation, CI/CD pipelines

EXPERIENCE

Planify – Gurgaon, India

2023 – Present

Lead Software Developer

- **Architecture, Security & Scale:** Orchestrated robust security enhancements including Role-Based Access Control (RBAC), Captcha integration, and advanced encryption, safeguarding sensitive financial transactions. Optimized user onboarding workflows, resulting in a **4x increase** in registrations.
- **Alpha AIF (Mobile App):** Spearheaded the development of a high-performance cross-platform mobile investment application using React Native and Zustand. Led a major **React Native version migration from 0.75 to 0.85**, ensuring compatibility with new architecture and resolving breaking changes across native dependencies. Integrated **EAS (Expo Application Services)** for streamlined build pipelines and OTA update management post-migration. Integrated CodePush OTA updates for seamless hot patching and built fluid micro-interactions using Reanimated.
- **Alpha Web & Alpha UI:** Engineered a modern web suite leveraging Next.js. Architected a secure **Investor Portfolio Dashboard** to track real-time assets. Designed and published **Alpha UI**, an enterprise-grade component library leveraging Radix UI and TailwindCSS, cutting frontend development cycles by 30%.
- **Planify App:** Scaled the mobile application to **10,000+ downloads** and drove a **40% reduction in app bundle size**. Integrated CodePush OTA updates for instant patches, worked with GraphQL APIs, and utilized advanced mobile profiling tools to optimize app performance and rendering latency. Implemented deep linking via Branch.io, secure biometric logins, and WebSocket chat with custom real-time safety filters.
- **Planify Web:** Revamped the web ecosystem into a fully responsive, mobile-first experience. Engineered a custom SEO indexing strategy making dynamic client-side pages crawlable by search engines. Leveraged Material UI and Highcharts to deliver high-fidelity financial data visualizations.

Makeen – United States

2022 – 2023

Software Developer

- **Bingsu:** Built a robust mobile app using React Native, exclusively **showcased at Amazon's re:Invent event**. Engineered reliable device integrations to collect and push high-frequency sensor data directly to an AWS IoT dashboard. Leveraged Vision Camera to implement a fluid video calling feature, and utilized Native Maps for real-time geolocation mapping, QR processing, and complex data collection capabilities.
- **Fintron Invest:** Maintained and scaled critical features for an investment platform. Ensured strict compliance measures, securely managed financial data, and sustained a reliable frontend experience for users.

BitCS – Noida, India

2020 – 2022

Software Developer

- **Yara (YaraConnect):** Architected and scaled the mobile application using React Native and Redux Saga, supporting **100,000+ active downloads**. Engineered an automated native OTP detection module that streamlined user verification and boosted onboarding conversion.
- **Engagement & Analytics:** Accelerated user retention and engagement by integrating CleverTap and secure Auth0 authentication, streamlining user journeys and core product metrics.
- **DevOps & Testing:** Orchestrated automated mobile deployments using Fastlane and CodePush (OTA), reducing release cycle times. Maintained comprehensive Jest unit testing suites across CI pipelines to guarantee 95%+ code reliability.

PROJECTS & OPEN SOURCE

JobFill – Smart Job Application Auto-Filler (Chrome Extension) React 19, TypeScript, Manifest V3

- **Extension Architecture:** Architected a React/TypeScript Manifest V3 extension to intelligently auto-fill complex applications on LinkedIn Easy Apply and major ATS platforms (Greenhouse, Lever, Workday).
- **Advanced DOM-Parsing:** Engineered a scalable matching engine utilizing heuristic scoring, regex, and accessibility attributes to accurately map 50+ form fields on heavily obfuscated web pages.
- **Infrastructure & DX:** Implemented secure cross-context messaging between background workers, React UI, and injected scripts. Optimized the Vite build pipeline for multi-entry targets and HMR.

CodeCapsule

Performance Optimization & Architecture Project

- **Cutting-Edge Architecture:** Constructed an experimental React Native application demonstrating custom Object-C/Kotlin Native computation engines, Advanced Tinder-style Gestures running at 120fps (Reanimated 3), Offline-First Sync Engines, and Security modules implementing strict Biometrics and SSL Pinning.
- **Exceptional Performance Scaling:** Analyzed bottlenecks through rigorous UI/JS thread stress tests. Systematically optimized state rendering with Zustand selectors and **FlashList**, noticeably increasing frame stability and UI responsiveness.

Corruption Watchdog

React, TypeScript, Firebase, Leaflet, Recharts

- **Secure Architecture:** Built a serverless reporting portal utilizing Firebase Auth and fine-grained Firestore security rules for secure, anonymous submission pipelines and administrative moderation dashboards.
- **Geospatial & Data Visualization:** Engineered interactive coordinate-based mapping using Leaflet and real-time analytical dashboards using Recharts, optimized for zero-latency client-side rendering.

PrepDocs – Senior Interview Prep

Vanilla JS, Vanilla CSS, HTML5

- **High-Performance Architecture:** Architected an ultra-lightweight, zero-dependency concept portal utilizing vanilla JavaScript to asynchronously fetch and render structured JSON datasets on-demand.
- **Premium UX/UI Engineering:** Developed a fully responsive dashboard featuring custom interactive accordions, dynamic modal views, and custom CSS-variable layouts optimized for fast painting.

EDUCATION

B.Tech

2016 – 2020

NSUT (AIACTR)

12th CBSE

2014 – 2015

Dashmesh Public School
